

Action Needed!

We will soon experience a Global food shortage.

Technology reduces employment.

Is Property causing poverty?

One of the biggest costs of living and pollution is the housing market.

If we have cheaper housing, we could have a four day working week, less stress, less traffic gridlock and less family breakdowns.

We used to spend just 10% of wages on housing and 50% on food. Today its 50% on housing and 10% on food.
